

# INTERNSHIP PROGRAM

BIOMEDICAL | BUSINESS | EDUCATIONAL STUDIES | ENGINEERING | HOME BUILDING TRADES | IT

## Education does not stop in the classroom.

Catholic Memorial provides opportunities for seniors to explore different careers and gain meaningful work experiences to guide their college and career paths.

## INTERNSHIP PROGRAM DETAILS

- Students work as an intern as part of their senior class curriculum
- Internship runs throughout the school year (September – May) with a minimum of 5 hours/week required (~40 hours/nine-week grading period)
- CMH Faculty evaluations and interviews are conducted to assist with the student-company matching process
- Job responsibilities are consistent with entry-level employees. Work can be rotational across various departments or project-based
- Student's grade determination includes a quarterly performance review completed by the supervisor and a year-end presentation to partner company and CMH Faculty

## INTERNSHIP PROGRAM GOALS

- Provide students meaningful, real-world work experience on-site at a local company
- Enhance students professional skills including problem solving, critical thinking, team work, communication, leadership and overall business acumen
- Offer students a rewarding and fun experience, mentored by a professional, with the opportunity to make a positive impact on the company
- Introduce interns to various career paths, while developing their knowledge-base in order to gain a competitive advantage for the future

*“Overall, my pharmacy technician internship was beneficial for experience working in the real world. It allowed me to handle conflicts and develop critical thinking skills. I learned a lot about the pharmaceutical world. My internship helped me determine what career path I want to go into.”*

*- Claire George, class of 2025*
